Re: Public Tender No. PD25001871 – Supply of Steel Pipes

1. On October 25, 2026, the documents of the above-referenced tender were published.

2. Set out below is a response to a clarification question received in the course of the tender process.

No.	Doc.	Section No.	Clarification Question	Response
1.	Invitation to Submit Bids	3.6	It is requested to amend and reduce the precondition requirement. In particular, it is requested to reduce the requirement for the supply of pipes in the amount of at least NIS 15,000,000, or to convert the requirement into a minimum general turnover for the supply of equipment in the energy sector.	The request is denied. It is clarified that precondition 3.6(b) refers to supplies of pipes meeting the required standard, with a minimum **aggregate** value of NIS 15,000,000 **or** USD 5,000,000 **or** EUR 4,300,000. Please note that such pipe supplies, in the said minimum aggregate value, may have been made to any number of customers, during the period from January 1, 2021, until the Submission Deadline of the tender. It is emphasized that this precondition was set taking into account the nature, needs and scope of the project, and in accordance with the provisions of law.

3. For the avoidance of doubt, any changes or reservations that were not answered or not expressly approved by the Company, shall not affect the tender documents (i.e. the tender documents shall remain unchanged).

Please note: The information provided to you, in whole or in part, may constitute "inside information" as defined in the Securities Law, 5728-1968, and its use constitutes an offense under that law, which may carry criminal consequences. We therefore ask that you keep this information confidential.

4. Bidders are required to attach this clarification letter to their proposals, signed by the Bidder's authorized signatories and in accordance with the Bidder's procedures.

Sincerely,

Procurement and Contracts Department
Energy Infrastructures Ltd.
